

## 2020 Membership Application

### OUR VISION:

The Liberty BMX Racing Team was established in 2006 by Mr. Lee Geddings, aimed at nurturing the growth, enjoyment, and development of families and racers. This Vision Plan will serve as our key management tool. Team members will be held accountable for their level of participation within an environment established around fun, mentoring, and demonstrating a high standard of conduct. The team IS NOT results oriented, but high results may help in providing individuals with recognition across the BMX community, where Liberty BMX may serve as a stepping stone to a higher level team later on down the line.

This will be encouraged, rather than discouraged, in the "Development" structure. Measurable results will provide valuable feedback to our on-track goals, and allow us to assess our racing progress over time. Dedicated team members should and will experience measured success on the track. Our long terms success will be measured by the impact we have had in developing upstanding members of our communities that, through their association with Liberty BMX Racing Team and the BMX Industry. This will allow Team Members to grow personally and achieve success beyond the BMX track.

Liberty BMX Racing provides a BMX racing platform aimed at ensuring a fun, healthy, and educational environment for the all amateur BMX athletes. The Team will emphasize enjoyment of the sport through fun and respectful competition; that promotes personal and athletic growth; that ensures that all of our riders have fun competing together as a team; where development of sportsmanship, leadership, character building, and camaraderie are prioritized. The ideal team members will be positive influences on their peers on the track, and carry that practice through off the track, and into their communities.
